

Configure issue custom fields

Jira application issues are made up of fields. You can choose any number of fields to appear when creating, editing, or transitioning issues. You can also create custom fields for teams working on issues within any of your Jira projects. Custom fields allow people to add information specific to your team's needs.

Create a custom field

Explore how you can create custom fields along with a few other tips.

[View topic](#)

Add a custom field to a screen

Control the screens that show the custom field in Jira Cloud.
