

## Search for an existing or shared dashboard

To search for a dashboard:

1. Choose the Jira icon (  or  ) > **Dashboards**.
2. Click ... > **Find dashboard**.
3. Enter your search criteria into the search field.

Each shared dashboard indicates its:

- Current owner. This is originally the user who created the shared dashboard.
- List of shares applied to the shared dashboard by its owner.

**i** Jira looks for exact matches to the search terms you enter in the search field. You can use different operators to help you find wildcard or fuzzy matches to your search queries. For example:

- Use the fuzzy search operator to help find dashboards that might contain misspellings: `dashboard~`
- Use the wildcard search operator to help find dashboards that begin with a phrase: `desh*`

### Add favorite dashboards

If you find a dashboard you use frequently, you can add it to your favorite dashboards so it appears in the sidebar.

1. Choose the Jira icon (  or  ) > **Dashboards**.
2. Click ... > **Find dashboard**.
3. Find the dashboard and select the star icon next to its name.
