▶ See how it works

Automate any task or process with a few clicks

Work smarter

Automation does the repetitive work so your team can focus on what matters most.

Endless use cases

From auto-assigning in Jira to syncing work across projects and products - the possibilities are endless.

Start in minutes

Anyone can build an automation rule in minutes. No code, no bottlenecks - simply select from our wide range of templates.

Automation   NEW

ⓘ Rule details

▶ When: New trigger
   Select an event or schedule.

○ Add component

▶ **New trigger**

Triggers start the execution of a rule. Triggers can listen for events or be scheduled to run.

All triggers ⌄ | Start typing to filter components |

Recommended

⬇ **Field value changed**
Rule is run when an issue's field value changes. POPULAR

💬 **Issue commented**
Rule is run when a new comment is added to an issue. POPULAR

➕ **Issue created**
Rule is run when an issue is created. POPULAR

〰 **Issue transitioned**
Rule is run when an issue is transitioned through its workflow. POPULAR

Issue triggers

⬇ **Field value changed**
Rule is run when an issue's field value changes.

💬 **Issue commented**
Rule is run when a new comment is added to an issue.

🗑 **Issue deleted**
Rule is run when an issue is deleted.

🔗 **Issue linked**
Rule executes when an issue is linked to another issue.

👤 **Issue assigned**
Rule is run when an issue is assigned to a user.

➕ **Issue created**
Rule is run when an issue is created.

🔗 **Issue link deleted**
Rule executes when an issue is unlinked from another issue.

← **Issue moved**
Rule executes when an issue is moved to a project.

Connect your work and tools with automation

Jira automation works across the tools you love like Slack, Microsoft Teams, Bitbucket, GitHub, and more. Work how you want with Jira as the foundation.
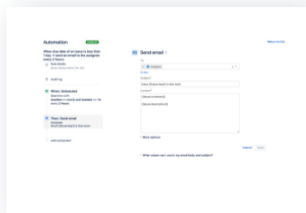

There's a template for that

We have hundreds of automation templates plus guides and videos to help you get started.
