Set up a wallboard

Turn any dashboard into a wallboard by plugging your computer into a TV monitor. The wallboard is a dashboard gadget that acts as an information radiator to provide instant visual insight into project progress and team accomplishments.

To view a dashboard as a wallboard:

1. Choose the Jira icon (◆ or ⬧) > **Dashboards**.
2. Choose your dashboard from the sidebar and click ••• > **View as wallboard.**

The dashboard will appear against a black background, and will rotate gadgets if the user enables the slideshow option.
