# The Automation Playground

This is a safe sandbox environment where you can interactively explore hundreds of automation templates. Filter using the labels on the left or via the search bar. At the moment, you can't import rules directly into Jira. Instead, recreate it in your own instance using the template as a guide.

Automation template library / Rules

Automation   ENABLED   Return to list ✅

When a commit is created and the status is 'To do' → then transition this issue to 'In Progress'

ⓘ **Rule details**
    Actor: Automation for Jira

🗐 Audit log

◇ **When: Commit created**
    ⚠ No Git provider connected

⇄ **Status equals**
    To Do

⤺ **Then: Transition the issue to**
    IN PROGRESS

○ Add component

Rule details

Name *
> When a commit is created and the status is 'To do' → then transition this issue

Description
> Automatically update the status of an issue when a commit has been created in Gitlab, Bitbucket or Github and in 'To Do'
>
> Use this rule to keep related issues synchronized with your CI/CD system.

Scope
> All projects   ⌄

Allow rule trigger
☐ Check to allow other rule actions to trigger this rule. Only enable this if you need this rule to execute in response to another rule.

Notify on error
> E-mail rule owner once when rule starts failing after success   ⌄

Owner *
> 👤 Steve Ruler   ⌄

The owner will receive emails when the rule fails.

Created
7 months ago

Actor
🔲 Automation app user
Automation
app The rule actor is the user who will perform actions defined in this rule. For
user example if your rule includes the 'Add comment to issue' action, then the
     comment will be added by the rule actor above.
     Please ensure the app user has the correct permissions to perform all actions
     in this rule.
